

Keep Your Locks, Enhance Your Security and Cut Costs

WITH THE ACCUTECH DELAYED EGRESS CONTROLLER

From getting the best nurses and staff to administering care to patients, building and operating a senior care facility comes with many fixed costs including investing in a wander management system. ResidentGuard will cause less disruption, give you back your time, and offer cost savings. Keep the locks you have (including RFT and Secure Care Locks), and reap the benefits of Accutech's leading wander management system.

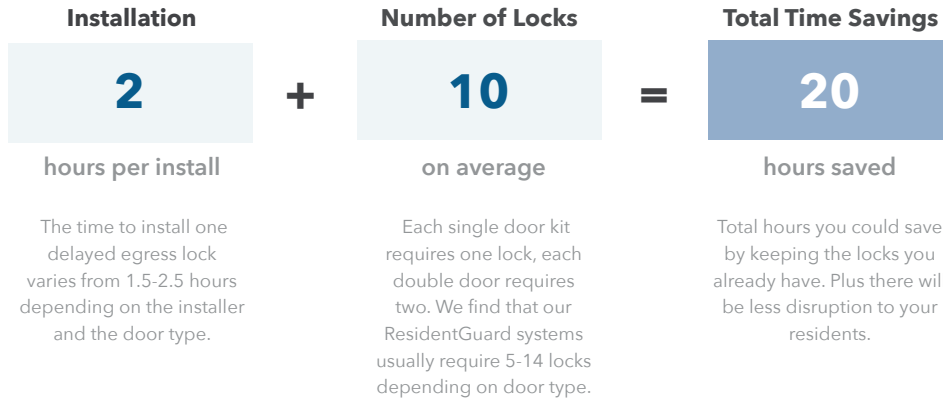

THE DOLLARS ADD UP

Hardware Cost	Installation Cost	Number of Locks	Total Cost Savings
\$400-\$800 <small>(MSRP)</small>	\$220 <small>(MSRP)</small>	10	\$8200 <small>(MSRP)</small>
cost per lock	cost per lock install	on average	dollars saved
The hardware cost for delayed egress locks is anywhere from \$400-\$800. So, let's say \$600 on average.	Most dealers charge \$75-\$150 per hour, depending on their location. The time to install one delayed egress lock varies from 1.5-2.5 hours depending on the installer and the door type.	Each single door kit requires one lock, each double door requires two. We find that our ResidentGuard systems usually require 5-14 locks depending on door type.	Total dollars you could save by keeping the locks you already have. Plus you'll upgrade to the Accutech system.

Curious how the costs add up for your facility? Take the formula above and plug in the number of locks that would need to be replaced. (Remember, this number is an estimate and could vary depending on your lock type, dealer, and location).

TIME SAVINGS

Want to know what the time savings looks like for your facility? Take the formula above and plug in the number of locks that would need to be replaced. (Remember, this number is an estimate and could vary depending on your lock type, dealer, and location).

Are there other advantages to ResidentGuard? Yes. See how our new delayed egress controller compares to the old one, and how it can help your facility run smoothly.
